

About Us

Plastibert & Cie nv is an international specialist in developing and manufacturing coated textiles. We are known as a flexible, reliable and solution-driven partner.

Our know-how and experience have allowed us to diversify while we constantly strive to provide innovation and quality. All our products are extensively tested, certified and recognised for their technical and aesthetic properties, which gained trust from major players in both private and public markets.

DIGITAL PRINTING

We offer Digital Printing to realise your vision in an easy, quick and flexible way.

Choose your coated base, and let us digitally print to suit your purpose.

Digital Printing gives you the opportunity to sample your designs before production.

Impression digitale sur Geotex Mono

Requirements

VECTOR / RASTER

PSD / AI / INDD / PDF / SVG / EPS / JPEG / PNG

RESOLUTION

Please provide a minimum of 300 Dpi at a scale of 1:1.

This is to be sure we can enlarge or repeat your print to the required size and length needed for your production.

COLORS

Please indicate a CMYK, RAL, LAB or Pantone reference.

For the overall visual:

you can provide a print as master, the print will be reinterpreted by our designers as close as possible.

Product Development

Research and development in coated textiles is part of our DNA. Thanks to this, we are able to offer green products with bio based PU resins, recycled Polyester, bio certified Cotton, ... To boost this, we actively create synergies with other (local) companies to replace synthetic materials with natural ones. Various products within Plastibert have the OekoTex 100 Class 1 label, which guarantees no hazardous substances – and limits the impact on the environment.
